

Course Unit Title	SES 521 Energy Design of Buildings
Programme of study	MSc in Sustainable Energy Systems (Distance Learning)
Lecturer	Dr.-Ing. Paris A. Fokaides
Type of course unit	Technical Elective
ECTS	5
Year of study:	1
Semester(s) offered	Spring Semester 2016, 2017, 2018, 2020
Course content	<ul style="list-style-type: none"> ▪ Aspects of the energy design of buildings that are related to the sustainable energy field. ▪ Energy interaction between the building shell and the environment ▪ Buildings shell design towards minimizing energy losses to the environment ▪ Energy behaviour of building elements ▪ Whole buildings energy analysis
Course modules:	<p><u>Module 1: Heat Transfer Principles Applied to the Built Environment</u></p> <ul style="list-style-type: none"> ▪ Heat Conduction in building elements. ▪ The interaction of the atmosphere and the building shell by means of heat convection. ▪ Solar radiation exposure of buildings and internal radiation thermal loads. ▪ The urban heat island effect <p><u>Module 2: Thermal performance of building elements</u></p> <ul style="list-style-type: none"> ▪ Definition of overall heat transfer coefficient of building elements (6946:2007) ▪ Thermal properties of building materials (10456:2007) ▪ Thermal insulating materials ▪ Calculation of heat losses from thermal bridges (14683:2007) <p><u>Module 3: Definition of buildings heating and cooling loads</u></p> <ul style="list-style-type: none"> ▪ Calculation of buildings heating and cooling loads based on the DD method ▪ Calculation of buildings heating and cooling loads based on the 13790:2008 standard ▪ Application of calculation software <p><u>Module 4: Indoor thermal comfort</u></p> <ul style="list-style-type: none"> ▪ The Fanger model for the definition of buildings indoor thermal conditions ▪ Parameters affecting the indoor thermal comfort ▪ Definition of PPD and PMV as comfort indicators <p><u>Module 5: Psychrometry:</u></p> <ul style="list-style-type: none"> ▪ Indoor air thermodynamic properties ▪ The psychrometric chart ▪ Calculation of air conditioning processes required energy using psychrometric chart ▪ Application of calculation software
